## OH ARCHITECTURE PRESENTS OH14

Adèle Naudé Santos and Antonio de Souza Santos Monograph. Between 1968 and 1973 A + A Naudé de Souza Santos designed a set of six highly accomplished buildings in Cape Town before pursuing successful careers in the United States. These modernist jewels are hidden amongst the residential suburbs of Newlands, Kenilworth, and Simonstown and each building projects a powerful connection with Table Mountain. Because of the architects' sensitivity to contextual concerns such as climate and site, the houses and apartment blocks display a rare ambivalence between strict adherence to the stylistic dogmas of the Modern Movement and a determination to depart from the rules.

Both Adèle Naudé Santos and Antonio de Souza Santos will be at the OH to lead visitors through the buildings and to answer questions.
